CONSULTATION FREE

We make no charge for coming to talk over your planting needs.
We do make a charge for calls for horticultural advice.

LANDSCAPE PLANS

A charge will be made for detailed landscape plans.

NOTE

We reserve the right to price plants selected by the customer according to their individual value, and prices are subject to change without notice.

SHIPPING INSTRUCTIONS

Our business has largely been local in character, serving the Eastern Shore of Maryland. The last few years have seen a growth in our shipping business to other parts of the country.

Our terms for plants to be shipped are cash in advance, the customer to pay the shipping charges. Only small B&B or bare root plants can be shipped. All plants will be packed properly in moss. No heavy plants requiring crating will be shipped.

THE EASTERN SHORE

No dashing surf or booming tide,
Pounds on the Eastern Shore,
Yet big ships glide on every side,
Far from the ocean's roar.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

The dogwood blooms at the salt sea's edge,
Along its creeks and bays,
No other strand in all the land
Has such splendid water ways.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

The pine trees mingle with the seas,
The wheat fields with the woods.
Strange to relate no other state
Is blessed with so many foods.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

The stranger's greeted with a smile
And welcomed with a nod,
For the folks all know the Eastern Sho'
Is direct from the hands of God.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

A GARDEN IS FOR PLEASURE

Gardening has long been a tradition of the leisured and quiet life on the colonial estates of the Eastern Shore of Maryland's Chesapeake Bay region. Our organization has been developed with the one thought in mind, of helping our clientele who have located here increase the Eastern Shore's fame as a garden spot.

In this little book you will find listed plants that we know are particularly suited to the soils and climate of the Eastern Shore. All of the plants included with the exception of the fruit trees are grown and tested in our nurseries.

Planning Your Garden

The modern nursery client is usually interested in buying plants to give his home a setting or for the creation of an outdoor picture. It is the effect produced that counts. To create the garden picture, it should be planned. Planning can be done by simple staking on the grounds, by rough sketches, or by complete landscape plans. Any one of these methods can be used by us to suit your needs. The color, the texture, the growth and character of the plant materials used are considered in relation to their surroundings to produce the complete picture. A charge is made for detailed landscape plans.

AFTER CARE OF YOUR PLANTS

Until plants are well established, it is best to keep them cultivated and the weeds kept down, to keep them mulched with manure or peat moss and the soil moist. This is most important the summer following the planting. A two weeks drought can kill a newly transplanted plant, that a well established plant can survive with ease.
